

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

EXERCISES.

229

IF $a^2 = b^2 - bc$ and $b^2 = c^2 - ca$, then $c^2 = a^2 - ab$.

[*Frank Morley.*]

230

SOLVE the equations

$$\begin{aligned}x^2(y - z) &= a, \\y^2(z - x) &= b, \\z^2(x - y) &= c.\end{aligned}$$

[*Frank Morley.*]

231

IF we take products of n consecutive terms of the arithmetical series a , $a - d$, etc., commencing for the first product with the first term, for the second product with the second term, and so on; and then multiply these products by the coefficients in the expansion of $(1 - x)^n$, the aggregate will be $n! d^n$, which is independent of the first term.

[*W. W. Johnson.*]

232

IF a square be inscribed in the face of a cube, the plane determined by one side and the corner of the opposite face corresponding to the adjacent corner of the same face touches the inscribed sphere.

[*T. M. Blakslee.*]

233

IF squares be inscribed in the faces of a cube, their sides and the corresponding vertices of the opposite faces determine 24 planes tangent to the inscribed sphere.

[*T. M. Blakslee.*]

234

IN a regular heptagon $ABCDEFG$, show that

$$\frac{1}{AB} = \frac{1}{AC} + \frac{1}{AD}.$$

[*Frank Morley.*]

235

FIND the areas of the greatest and of the least rhombus inscribed in an ellipse.

[*R. H. Graves.*]
